

New Sponsorship Opportunity for Our Business Partners – Support APPA’s Body of Knowledge!

APPA is presently revising and updating the APPA Body of Knowledge (BOK) – known throughout the educational community as the single, most authoritative reference guide for the educational facilities professional. The upcoming fourth edition of the Body of Knowledge will be published in a digitized format. Online access to the BOK will allow 24/7 access to educational professionals world-wide who will read, as well as print, copies of this widely popular manual from the APPA website at www.appa.org.

APPA is now providing an opportunity for members of APPA’s Business Partner Community to be recognized as corporate sponsors of the Body of Knowledge.

As the foremost, core resource of its kind to the education facilities profession, the BOK serves as the foundation of learning for many of APPA’s programs and services, to include the curriculum of APPA’s widely popular Institute for Facilities Management, and as examination study material for the growing APPA professional certification programs.

The BOK is composed of four core competency areas:

- General Administration and Management
- Operations and Maintenance
- Energy, Utilities, and Environmental Stewardship
- Planning, Design, and Construction
