

APPA Facilities Drive-In Workshop For Community Colleges, Universities, and K-12s

From our past attendees:

"I thoroughly enjoyed all of the fume hood insights."

"I valued the chance to network with others who also work with science buildings."

"I met people who can help!"

"All facility managers and owners should be encouraged to attend."

Tuesday, December 6, 2011
10:00 am – 2:00 pm

University of Georgia
Athens, GA

Workshop registration and luncheon is complimentary.

Who Should Attend:

Anyone concerned with science facilities (budgets - capital and operating, energy usage, design, construction and fit-out of any size, EH&S) should consider this seminar and bring others along, especially those managing energy budgets, fume hood infrastructure costs and lab renovations.

Program Content:

This four-hour program will review how changes in science, research methods and support products will change new campus buildings and renovations, and how these changes can affect facilities staff as well as energy, operating and capital budgets.

Topic Areas Will Include:

- Designing for New and Renovated Science Buildings
- Ideas to dramatically reduce fume hood energy and infrastructure costs
- Tips and hazards for fast lab renovations

Speakers include:

- **Eric Slifer**, President and Senior Lab Planner, Facility Elements LLC
- **Karl Aveard**, Vice President, GFH Technologies USA
- **Jeanne Qiu**, Central U.S. Manager, GFH Technologies USA
- **Vince Matthews**, Laboratory Furniture Specialist, VWR Inc.

Hosted by: **University of Georgia**
