

[301: Risk Management]

Energy and Utilities
APPA Institute for Facilities Management

Brett Garrett
Jeff Zumwalt

1

[Overview]

- Provide an overview of basic risk management concepts
- Review how risk management applies to various components of Utilities and Energy Management

2

[General Concepts]

Risk

- The hazard or chance of loss - Impact and Probability

Risk Management

- Identify risks
- Categorize and rank risks
- Mitigate risks

3

[Risk Assessment]

Types of Risk - PEAR

- People
- Environment
- Assets
- Reputation

APPA 4

[Risk Assessment]

Impact Factors:

- Permanence or Restorability
- Financial
- Reputation
- Cascading

APPA 5

[Risk Assessment]

Probability Factors:

- Geographic/Location
- Experience
- Knowledge/Skill Level
- Condition of Equipment

APPA 6

Risk Assessment – Your Role

- Understand how your institution perceives and manages risk
- Integrate your approach to align with institution
- Collaborate

7

Risk Assessment

Two Common Approaches:

- Risk Matrix
 - intuitive and quick
 - can be “internally” developed

8

Risk Matrix

9

Risk Mitigation

- **Reduction** – reduce impact or probability
Replace susceptible equipment
- **Control** – minimize damage
Plan for backup housing
- **Transfer** – assign responsibility to others
Get insurance
- **Acceptance** – live with the risk
For “low impact/low probability”
- **Avoidance** – stop doing the risky activity

APPA 11

Understanding Your Context

- National
- Regional
- State
- Local
- Campus

APPA 12

American Society of Civil Engineers (ASCE)

National Report Card in 17 categories = C-

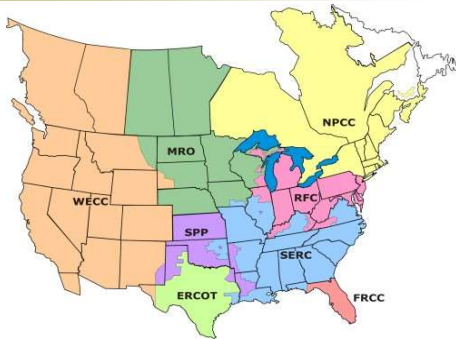

Drinking Water	D	Schools	D+
Storm Water	D	Transit	D-
Waste Water	D+	Dams	D
Solid Waste	B-	Energy	C-
Roads	D	Bridges	C

<https://infrastructurereportcard.org/>

13

NERC Regions

Risk Management – Desired Outcomes

- **Reliable** – rarely fails
- **Redundant** – backup options
- **Resilient** – recover quickly/seamlessly
- **Efficient** – minimize waste

15

Roles and Responsibilities

The Institution

- What comprises risk
- Acceptable levels of risk
- Resources provided for mitigation

Facilities Management

- Identify and communicate facility risks
- Outline solutions and costs
- Insure effective implementation

16

Discussion

- Have you experienced a catastrophic failure in your career?
- What happened and what steps did you take to prevent recurrence?

17

Managing Risk

1. Identify your most critical processes
2. Determine failure modes
3. Use risk matrix to prioritize
4. Develop solutions for high risks
5. Mitigate high risks - if possible
6. Communicate high risks that can't be mitigated

18

Questions, Comments, Observations?

- Sign-in Sheet & Evaluations
- Related Electives
 - 363 – Disaster Prep and Business Continuity
 - 373 – Energy Conservation
 - 325 – Electrical Systems - Planning, Reliability, and Safety

<https://www.appa.org/Research/CFaR/tls.cfm>

Managing Risk – Activities

1. Identify risky activities
2. Determine failure modes
3. Use risk matrix to prioritize
4. Develop solutions for high risks
5. Mitigate high risks - if possible
6. Communicate high risks that can't be mitigated

20

Activity – Hospital Helipad

21

[Risk Assessment]

Types of Risk - PEAR

- People
- Environment
- Assets
- Reputation

APPA 22

[What are the risks?]

- People
- Environment
- Assets
- Reputation

1 – 2 – 4 – All

a. Individual – 1 minute

b. Pair Up – 2 minutes

c. Table – 4 minutes

d. All – 5 minutes

APPA

[Risk Assessment]

Impact Factors:	Probability Factors:
■ Permanence	■ Location
■ Financial	■ Experience
■ Reputation	■ Knowledge
■ Cascading	■ Condition
Rank (0 -10)	Rank (0% - 100%)

APPA 24

Managing Risk – Processes

1. Identify your most critical processes
2. Determine failure modes
3. Use risk matrix to prioritize
4. Develop solutions for high risks
5. Mitigate high risks - if possible
6. Communicate high risks that can't be mitigated

28

Process – Heating the Campus

29

How can the process be interrupted?

- Deliver fuel to the boiler
- Burn fuel to make steam
- Distribute steam to buildings
- Return hot water to boiler

1 – 2 – 4 – All

- a. Individual – 1 minute
- b. Pair Up – 2 minutes
- c. Table – 4 minutes
- d. All – 5 minutes

Risk Assessment

Impact Factors:

- Permanence
- Financial
- Reputation
- Cascading

Rank (0 -10)

Probability Factors:

- Location
- Experience
- Knowledge
- Condition

Rank (0% - 100%)

31

Risk Matrix
